**Brief Summary:** The visit aims at meeting with the representatives from Armenian HEIs by UoR team as part of WP1 implementation to discuss the fact-finding and the results of the surveys conducted by AUA and YSAFA. UoR will have a day visit to AUA on 10<sup>th</sup> of May to meet the staff, administration and the students of the university and one-day visit to YSAFA – 11<sup>th</sup> of May 2017 to meet the university staff, administration and students. The universities will also have opportunities to discuss on the available and required equipment for the disabled students.

#### Day 2: 11.05.2017

**YEREVAN STATE ACADEMY OF FINE ARTS (YSAFA)**

**Address:** Isahakyan 36, Yerevan, Armenia

**Main Building, 2<sup>nd</sup> floor, Meeting Hall**

**OUTLINE:** The aim of the meeting at YSAFA is to present the project goals and objectives and activities focusing on the WP1 implementation and results to be achieved after the completion of the WP. The visit will also enable to discuss the results of the survey conducted among 50 students and 8 staff members from YSAFA and see the gaps and analyses for further developments relating to the underrepresented groups at YSAFA. The meeting will focus on the discussion of the resources and equipment available and requested by the university staff for the underrepresented students.

<b>Main findings and recommendations from the site visit<sup>1</sup></b>	<p>Please outline relevant findings/recommendations you may have in line with the guidelines elaborated for site visit meetings (ANNEX 1):</p> <p><b>A. Findings/recommendations regarding underrepresented groups at the PCU:</b></p> <ul style="list-style-type: none"> <li>Nearly all of YSAFA's students come from just 2 or 3 schools in Armenia, due to the very specialist nature of the subject area (fine art and design). It would be good to see a wider range of schools / colleges involved in the admissions process, to ensure that more students with an interest in fine art / design are able to apply for places.</li> <li>It would be good to have regular tutorial times for students, as some students noted that certain faculty were remote, difficult to contact and did not regularly use their email accounts. This aspect of the faculty role could be explored during the INCLUSION project, as better contact from faculty (regarding assignments or exams etc) would be of benefit to all students.</li> <li>It would be useful to have one or two classrooms that were particularly accessible and well equipped for students, e.g. with full IT facilities and a hearing induction loop for students with impaired hearing. Some of the YSAFA buildings may be unsuitable for lifts / ramps due to their design / age, but a full review of teaching accommodation would be useful during the course of the INCLUSION project, with a view to future planning opportunities.</li> </ul> <p><b>B. Findings/recommendations regarding roles and strategies of the PCU:</b></p> <ul style="list-style-type: none"> <li>It will be useful for YSAFA to review their admissions policy, to enable a wider range of students to attend the university.</li> <li>Perhaps consider the way in which international students are supported in their learning of the Armenian language ( e.g. provide a subject glossary / definitions of key terms). These issues were discussed at length in the PICASA project, which YSAFA participated in from 2013-2016, perhaps the INCLUSION team can involve these colleagues at some point in their discussions around inclusion / accessibility?</li> </ul>		

<sup>1</sup> This is the very essence of the report and should summarize all main findings in line with the topics identified in Annex 1.

	<ul style="list-style-type: none"> <li>• A useful discussion took place around the possibility of buying suitable software / equipment for use with under-represented groups, and this will be discussed further at the June meeting at AUA.</li> </ul> <p><b>C. Findings/recommendations regarding specific measures to support students from underrepresented groups:</b></p> <ul style="list-style-type: none"> <li>• There are several faculty who do not use Powerpoint or any other form of software, but prefer to present verbally. This may disadvantage students who find it hard to take notes in class, or those with impaired hearing. It will also disadvantage any international students who are unfamiliar with the Armenian language. One student noted that “some faculty never give us a handout or do a PowerPoint, so some of us find it very difficult to concentrate for any length of time”.</li> <li>• It will be useful for the university to consider implementing a virtual learning environment, such as WebCT / Blackboard / Moodle, to enable faculty to share handouts / reading lists / other learning resources. Faculty and students will need training and support for this to happen.</li> <li>• Students noted that some faculty are not willing to give very much advice or support when work is due in for assessment. A virtual learning environment, as noted above, may be a solution to this issue. One student noted that occasionally faculty are quite negative when students request support, and are not very patient when students are experiencing difficulties with their work.</li> </ul> <p><b>D. Findings/recommendations regarding capacity building/training needs:</b></p> <ul style="list-style-type: none"> <li>• It would be useful for all new faculty (and existing faculty) to undertake some training in <i>inclusive approaches to learning and teaching</i>, to ensure that all students have a fair chance of academic success during their time at the university. The INCLUSION project will be able to offer support and advice in this key area.</li> <li>• Development of IT systems and electronic resources will benefit all students, especially those with a disability and / or international students</li> </ul> <p><b>E. Findings regarding literature reviews:</b></p> <ul style="list-style-type: none"> <li>• The literature review provided a useful starting point for discussions with the group of students, especially around the topics of: <ul style="list-style-type: none"> <li>▪ IT / e-learning</li> <li>▪ Learning styles / different ways of learning</li> <li>▪ Admissions procedures and marketing / publicity initiatives</li> <li>▪ Faculty training in inclusive and accessible approaches</li> <li>▪ Accessibility of teaching rooms / accommodation</li> </ul> </li> </ul>
<p><b>Follow-up actions for EU experts based on findings and recommendations from the site visit (if any)</b></p>	<ul style="list-style-type: none"> <li>• Bridget to bring resources / information to the INCLUSION June AUA event regarding specialist software and equipment ( e.g for students with disabilities)</li> <li>• Discuss with INCLUSION colleagues the need for guidelines for inclusive and accessible approaches to learning and teaching</li> <li>• Discuss with INCLUSION colleagues the need for inclusive practices to be fully reflected in institutional quality assurance systems and processes (e.g. on course</li> </ul>

	evaluations by students)
<b>Follow-up actions for PCUs based on findings and recommendations from the site visit (if any)</b>	<ul style="list-style-type: none"> <li>• None at the moment</li> </ul>
<b>Other comments (if any)</b>	This was a useful and beneficial visit, and provided a good starting point for our INCLUSION discussions.
<b>Attachment to report</b>	PPP with presentation of main results from PCU and student surveys of your twinning partner in line with ANNEX I (GUIDELINES FOR MEETINGS WITH PCU STAFF/STUDENTS DURING SITE VISITS).
