<i>WP type:</i>	<b>MANAGEMENT</b>
<i>WP N:</i>	<b>WP8: Project Management</b>
<i>WP duration:</i>	<b>36 months</b>
<i>WP Lead Partner:</i>	<b>YSAFA, Armenia</b>
<i>Partners involved:</i>	<b>All partners: YSAFA, AUA UNISON, UNT, UNTZ, SMOC, WUS, KFUG, UCLL, UoR, ANSA, MoES, FMON, MLSA</b>

## (2) BACKGROUND

### **(3) IN BRIEF**

**AIM:** The WP aims at ensuring smooth implementation and timely management of the project in general and of the activities in particular with the involvement and contribution of all project partners.

**DESCRIPTION:** The project management evolves around 8 workpackages and each of the WP has its lead partner, best qualified to further design and implementation of the WP (*WP1-WUS, WP2-UoR, WP3-UCLL, WP4-AUA, WP5-WUS, WP6-AUA, UNT, WP7-YSAFA and WP8-YSAFA*). This ensures inclusion of all the partners in the management, strengthens the ownership and capitalizes on the respect to values to achieve greater level of discretionary efforts, and mitigates potential conflicts.

The project organizational management is conducted at three distinctive levels:

- **Overall consortium level:** GB, established with the inclusion of all partners, makes decisions on various aspects. The project coordinating institution (*YSAFA*) is responsible for the overall operational, financial and technical management.
- **PC level:** each partner country (AM and BiH) appoints a local coordinator to be responsible for the smooth and timely implementation of the activities, clear communication and active involvement of all partners at partner institutions (*SMOC in BiH and YSAFA in AM*).
- **Institutional level:** each partner establishes a local working team to coordinate logistics, finances and development aspects at home institution. All partner institutions are to ensure the timely reporting of the activities to the WP lead partner and the management team of the coordinating institution.

Regular local meetings, coordination meetings with all partner institutions are planned to ensure effective communication within the project. During these meetings, partners will be able to assess and discuss the progress of project implementation and agree on action plans with tasks to be achieved. In addition, communication will also be done by using e-mails, skype meetings, and webinars in order to react swiftly to potential risks that may occur during the project lifetime.

**OFFICIAL** documentation is also a part of smooth cooperation and effective management (*Grant Agreement, Partnership Agreements, Official letters, etc.*). Roles, tasks and responsibilities are well described in the GA and PAs (signed with each of the partner institution).

The management team (with the support of all partners) will conduct:

- ⇒ **operational management**
- ⇒ **technical management**
- ⇒ **financial management**

**OPERATIONAL MANAGEMENT:** the management team (together with the lead partners) is to develop work plans per WP and set deadlines for the implementation of the activities within the WP. The constant reminders are to be sent to the consortium and respective events are to be scheduled.

**TECHNICAL MANAGEMENT:** constant communication is a key to the success for the project implementation. This communication is to be conducted via e-mail ([socincl.coord@gmail.com](mailto:socincl.coord@gmail.com) & [includi.mngt@gmail.com](mailto:includi.mngt@gmail.com)), DROPBOX, web site, meetings, etc.

**FINANCIAL MANAGEMENT:** timely reporting on the expenses, transfers and submission of the necessary supporting documents is the key to successful implementation of the financial part of the project. This will ensure having a positive report from the financial audit. Financial management of the project is done through budget headings (staff costs, travel costs, costs of stay, equipment and subcontracting) keeping all the records and compulsory supporting documents for each of the heading.

The overall and detailed description of the financial and technical management of the project is well presented in the GUIDE available for all consortium members.

The required templates, guides, documents for the successful technical and financial management are to be prepared by the management team and circulated among all consortium members ensuring the transparency of the activities and successful reporting of the results.
